QUESTION 1

Your x86-based Solaris server will not boot from the primary boot drive. Because the boot drive has been mirrored, you need to change the server so that the system boots from the alternate boot disk. Which answer describes the procedure to change the default boot disk?

A. Change the bootpath parameter in the bootenv. re file so that it points to the correct boot drive.

B. Change the bootpath parameter in the boot archive file so that it points to the correct boot drive.

C. Use the eeprom command to change the bootpath parameter so that it points to the correct boot drive.

D. Use the bootadm command to change the bootpath parameter so that it points to the correct boot drive.

Correct Answer: A

QUESTION 2

Given this line from the name service configuration file:

hosts:nis [NOTFOUND=return] files

Which two statements correctly describe the behavior of the name service switch? (Choose two.)

A. If NIS were unavailable, the attempt to locate a host\\'s IP address would be abandoned.

B. If NIS were unavailable, the attempt to locate the host\\'s address would be continued within the local file (/etc/inet/hosts).

C. If NIS were available, but a host IP address was NOT in the NIS map, the attempt to locate the host\\'s address would be abandoned.

D. If NIS were available, but a host IP address was NOT in the NIS tables, the attempt to locate the host\\'s address would be continued by searching for it in the local file (/etc/inet/hosts).

Correct Answer: BC

QUESTION 3

Given:

usermod -P Profile user1

Which two statements are true? (Choose two.)

A. The user1 user loses all other profiles.

B. The user1 user gets assigned Profile.

C. The user1 user loses all authorizations in the user_attr file.

D. The user1 user gets all authorizations from Profile added in the user_attr file.

Correct Answer: AB

QUESTION 4

Your system is newly built and has a default set up. When you add an account using roleadd, what is the default shell?

A. /usr/bin/sh

B. /usr/bin/ksh

C. /usr/bin/pfsh

D. /usr/bin/prsh

E. /usr/bin/pfjsh

F. /usr/bin/prksh

Correct Answer: C

QUESTION 5

You are working on a system connected to the network. You are attempting to access a currently mounted NFS directory. Your system displays the message:

nfs mount: hostl: : NFS: Service not responding nfs mount: retrying: Aisr/share/man

What can you do to solve this problem?

A. Ensure that nfsd is running on the NFS server.

B. Ensure that mountd is running on the NFS server.

C. Send a HUP signal to the inetd process on the NFS server.

D. Send a HUP signal to the rpcbind process on the NFS server.

Correct Answer: A
