QUESTION 1

On a system with a number of zones installed, all zones are NIS clients of the global zone. A second NIS domain is required. Which statement is true?

- A. Non-global zones can only be DNS clients.
- B. This is NOT possible. Only one NIS server can run on a system and all zones need to be NIS clients of the same domain.
- C. The administrator can create a new zone with a second NIS server. Each zone is free to pick its own domain name.
- D. Zones can be in different NIS domains, but you can run only one NIS server on one system.

Correct Answer: C

QUESTION 2

There is a project that requires a large number of systems to be re-installed on the network. Each installation needs to be hands off and tailored to the task for which the system is intended. Which installation method allows for the specific tailoring of these installs?
