### QUESTION 1

Place each object on its description. Not all descriptions are used.

Select and Place:

Place each object on its description. Not all descriptions are used.

**Descriptions**

Place here	preliminary data used to synchronize communications
Place here	data added to allow testing of frame integrity
Place here	the largest dataqram that can be sent without being broken down into smaller units
Place here	the unique hardware address of a network interface
Place here	data added to an Ethernet frame when the frame is too small
Place here	section of an Ethernet frame describing the data included in the frame

**Objects**

MTU	CRC	Preamble	MAC	Done
-----	-----	----------	-----	------

Correct Answer:

Place each object on its description. Not all descriptions are used.

### Descriptions

Preamble	preliminary data used to synchronize communications
CRC	data added to allow testing of frame integrity
MTU	the largest datagram that can be sent without being broken down into smaller units
MAC	the unique hardware address of a network interface
Place here	data added to an Ethernet frame when the frame is too small
Place here	section of an Ethernet frame describing the data included in the frame

### Objects

MTU	CRC	Preamble	MAC	Done
-----	-----	----------	-----	------

### QUESTION 2

You have configured an IPv6 router that is having problems routing correctly to a default router connected to the Internet. You need to investigate the machine's routing table and check that the default route is in place. You also need to check the neighbor cache to see whether the MAC address of the default router has been learned. Which two commands enable you to perform these tasks? (Choose two.)

- A. netstat -r
- B. arp -n
- C. netstat -m
- D. netstat -p
- E. ifconfig -a

Correct Answer: AD

### QUESTION 3

You want to configure the hme0 interface with an IPv6 address and the prefix fec0. Which two configurations achieve this? (Choose two.)

- A. The file `/etc/hostname6.hme0` contains an addif hostname entry in addition to the normal host name. This cross-references an entry in `/etc/inet/ipnodes` with IPv6 address prefix `fec0:`.
- B. The file `/etc/hostname6.hme0` contains a host name defined in the `/etc/inet/ipnodes` file. This entry has an IPv6 address prefix of `fec0`.
- C. The file `/etc/hostname6.hme0:1` contains a host name, which is defined in the `/etc/inet/ipnodes` file. This entry has an IPv6 address prefix of `fec0`.
- D. The file `/etc/hostname6.hme0:1` contains a host name, which is defined in the `/etc/hosts` file. This entry has an IPv6 address prefix of `fec0`.

Correct Answer: AC

#### QUESTION 4

You have installed a Solaris OS system with two physical network interfaces in addition to the loopback interface. You have not manually modified the IP forwarding properties in any way. Which two statements regarding IP forwarding between the two interfaces are true? (Choose two.)

- A. IP forwarding is configured using the `routeadm` command.
- B. IP forwarding is NOT enabled between the two interfaces.
- C. IP forwarding is enabled unless the file `/etc/defaultrouter` exists.
- D. IP forwarding is always enabled between the interfaces.
- E. IP forwarding is enabled unless the file `/etc/notrouter` exists.

Correct Answer: AB

#### QUESTION 5

Users of a newly installed system are reporting network throughput below expected values. A common indicator of a potential issue is an increasing number of collisions reported on the network interface. Which command displays network collisions on the `hme0` interface?

- A. `netstat -i`
- B. `snoop -d hme0 -s collision_count`
- C. `ndd -get /dev/hme collisions`
- D. `netstat -d hme0`

Correct Answer: A
