Click the Task button.

Place the cryptographic providers next to the correct class functions.

Drag and drop question. Drag the items to the proper locations.

Select and Place:

Correct Answer:

QUESTION 3

To enforce security within your organization, access restrictions to systems must be applied. In particular, restrictions to the telnet protocol must be configured. Which action must be taken to enable TCP wrappers for the telnet protocol?

A. svcadm tcp_wrappers start

B. svcadm enable tcp_wrappers

C. inetadm -m telnet=tcp_wrappers

D. inetadm -m telnet tcp_wrappers=true

Correct Answer: D

QUESTION 4

The security administrator has been tasked to design a minimally installed centralized logging server. The administrator needs to examine the packages included in the Solaris installation clusters to determine which metacluster will be the best starting installation for the planned configuration. In which file on the installation DVD can the adminstratior find the packages associated with each metacluster?

A. mountpoint /.cdtoc

B. mountpoint /.install_config

C. mountpoint /Solaris_10/Product/.clustertoc

D. mountpoint /Solaris_10/Product/.packagetoc

Correct Answer: C

QUESTION 5

Your company has acquired a small company and your task is to set up the first Solaris server in their network. As there is no existing JumpStart environment, you will have to start from scratch. Which metacluster is best suited for initial installation of a strict minimized system?

A. Entire Distribution (SUNWCall)

B. Core Software Support (SUNWreq)

C. End User System Support (SUNWCuser)

D. Reduced Networking Core System Support (SUNWCrnet)

Correct Answer: D
