QUESTION 1

Which three statements describe valid reasons why queries that use "SELECT" construct are discouraged?

- A. SELECT * may cause more data than you need to be read from disk if your application needs only some columns.
- B. SELECT * causes more data than you need to be sent via the client/server protocol if your application needs only some columns.
- C. SELECT * prevents the use of indexes, so a full table scan for every query.
- D. SELECT * causes your application to depend on the columns present when you wrote it, so your application could break if the table structure changes.
- E. SELECT * causes the statements to return all rows from the table.

Correct Answer: DE

QUESTION 2

What is true about the contents of the INFORMATION_SCHEMA table?

- A. It contains information about the table structure for all databases.
- B. It contains information about all the tables, triggers, and views for all databases.
- C. It contains information such as name, character set, and collation for all the databases on the server.
- D. It contains information including tables, trigger, stored routines, and views for all databases

Correct Answer: B

QUESTION 3

Using the MYSQL command line client you have received the error "Lost connection to MYSQL server query"

Which three are possible causes of the error?

- A. The MYSQL server stopped working during query execution.
- B. The network connection was interrupted during query execution.
- C. The connection that issued the query was killed.
- D. The client connection stayed idle for longer than interactive timeout seconds and was closed.
- E. The client sent an erroneous query to the server causing the connection to be closed.
- F. The server interrupted client connection after max-connect-errors was achieved.

Correct Answer: BEF

QUESTION 4

The friends table has the columns and contents as shown: Mysql> SELECT * FROM friends;
