QUESTION 1

Which command will switch a device group, named ds1, from node1 to node2?

- A. `cldg switch -n node2 ds1`
- B. `haswitch -d ds1 -h node2`
- C. `node1 > metaset -s ds1 -r node2> metaset -s ds1 -t`
- D. `clswitch ds1 from node1 to node2`

Correct Answer: A

QUESTION 2

During the scinstall process the cluster administrator has to configure the cluster transport.

Which step does the cluster administrator have to perform in a typical cluster configuration?

- A. Select the transport adapters.
- B. Select the IP range for the private networks.
- C. Construct the public network VLANS for a tagged VLAN.
- D. Select the netmask for the cluster interconnect on a typical install.

Correct Answer: A

QUESTION 3

You have a three-node cluster in a "Pair +1" configuration. Two nodes are connected to shared storage and the third is not. You choose only one quorum disk device. What is the problem?

- A. A Pair +1 cluster requires both a quorum disk device and a quorum server quorum device
- B. There is no problem. Since two nodes are connected to the shared storage device, you should use exactly one quorum disk device.
- C. The problem is in the "Pair + 1" configuration. Since your third node has no storage connected it is incapable of running clustered applications anyway.
- D. Even with one quorum disk, you will still only be able to run the cluster if two nodes are present. But this would be the same if you had no quorum devices at all.

Correct Answer: D

QUESTION 4

The Sun Cluster 3.2 framework provides Global Storage Services. Which is applicable?

- A. DID devices must be used to configure a quorum server quorum device.
- B. DIDs are used as components of Solaris and Veritas Volume Manager volumes.
- C. Each cluster node accesses the global device groups through the local path to the storage.
- D. Shared disks that may have different logical names on different nodes are given a unique cluster-wide DID number.

Correct Answer: D

QUESTION 5

Which command will shut down all nodes of the cluster?

- A. init 0
- B. shutdown -y -g0
- C. cluster shutdown -y -g0
- D. scadmin shutdown -y -g0

Correct Answer: C
