QUESTION 1

Which two statements are true about a global file system? (Choose two.)

- A. It is seen as mounted only on one node.
- B. All nodes have simultaneous access to the data.
- C. All nodes directly connected to the storage can do direct i/o.
- D. All nodes do NOT have to be directly connected to the storage.

Correct Answer: BD

QUESTION 2

You need to take one of your Solaris Volume Manager device groups offline for some emergency repairs. The device group is called ds1 and all devices are used as file systems. You have unmounted all the file systems.

Which command would you run to offline the device group?

- A. cldg offline ds1
- B. cldg switch offline
- C. cldg offline -s ds1
- D. cldg switch offline -s ds1

Correct Answer: A

QUESTION 3

You have a two-node cluster with a failover UFS file system that you control by setting up a HAStoragePlus resource with the FilesystemMountPoints property set to the value /oracle:/shmoracle.

Where will the file system be mounted?

- A. On /oracle on nodeA but on /shmoracle on nodeB.
- B. On a single mount point literally named /oracle:/shmoracle.
- C. On /oracle, but if that mount point is not available the mount will fail over to /shmoracle.
- D. On /oracle on either node's global zone, but loopback mount made to /shmoracle within any non-global zone on which the resource group is configured.

Correct Answer: D

QUESTION 4

A customer has a four-node cluster configured as a scalable topology. No quorum devices have been configured. How many nodes must be present in order for the cluster to be able to offer any of its application services?

- A. one
- B. two
- C. three
- D. four

Correct Answer: C

QUESTION 5

Which tasks are performed by the Sun Cluster 3.2 framework components?

- A. The CMM causes resource groups to fail over between cluster nodes.
- B. The RGM is used to start and stop the application on the cluster nodes.
- C. The CCR manages the cluster-wide agreement on the set of nodes booted into the cluster.
- D. If the RGM detects a critical problem with a node, it calls upon the cluster framework to forcibly shut down (panic) the node.

Correct Answer: B
