QUESTION 1

Which of the following are attributes of the annotation javax.servlet.annotation.WebFiler?

(i)

 Name

(ii)

 servletNames

(iii) urlPatterns

(iv)

 dispatcherTypes

(v)

 supportAsync

A.

(iii) only

B.

(iii) and (iv)

C.

(ii), (iii) and (iv)

D.

(iii), (iv) and (v)

E.

(ii), (iii), (iv) and (v)

Correct Answer: B

*

 (iii) urlPatterns

The URL patterns to which the filter applies

*

 (iv) dispatcherTypes

The dispatcher types to which the filter applies

*

 (not V): asyncSupported

Declares whether the filter supports asynchronous operation mode.

Note:

*

 javax.servlet.annotation Annotation Type WebFilter

Annotation used to declare a servlet filter.

This annotation is processed by the container at deployment time, and the corresponding filter applied to the specified URL patterns, servlets, and dispatcher types.

QUESTION 2

Which two are true about the JSTL core iteration custom tags? (Choose two.)

A. It may iterate over arrays, collections, maps, and strings.

B. The body of the tag may contain EL code, but not scripting code.

C. When looping over collections, a loop status object may be used in the tag body.

D. It may iterate over map, but only the key of the mapping may be used in the tag body.

E. When looping over integers (for example begin= `1\\' end= `10\\'), a loop status object may not be used in the tag body.

Correct Answer: AC

QUESTION 3

Which method must be used to encode a URL passed as an argument to HttpServletResponse. sendRedirect when using URL rewriting for session tracking?

A. ServletResponse.encodeURL

B. HttpServletResponse.encodeURL

C. ServletResponse.encodeRedirectURL

D. HttpServletResponse.encodeRedirectURL

Correct Answer: D

QUESTION 4

ServletContextListeners are invoked in

A. Random order

B. contextInitialized and contextDestroyed are invoked in the order in which they are declared in the web.xml

C. contextInitialized method are invoked in the order in which they are declared in the web.xml and the contextDestroyed method is invoked in the reverse order in which they are declared in the web.xml

D. contextInitialized and contextDestroyed are invoked in the reverse order of which they are declared in the web.xml

Correct Answer: C

public interface ServletContextListener extends java.util.EventListener Interface for receiving notification events about ServletContext lifecycle changes.

In order to receive these notification events, the implementation class must be either declared in the deployment descriptor of the web application, annotated with WebListener, or registered via one of the addListener methods defined on ServletContext.

Implementations of this interface are invoked at their contextInitialized(javax.servlet.ServletContextEvent) method in the order in which they have been declared, and at their contextDestroyed (javax.servlet.ServletContextEvent) method in reverse order.

QUESTION 5

A web application for business expense reporting allows uploading expense receipts. Multiple receipts can be uploaded single step using one HTTP request. The servlet that processes the request has been marked with the @MultipartConfig annotation. Which method should the servlet use to access the uploaded files?

A. HttpServletRequest.getParts()

B. HttpServletRequest.getData()

C. servletRequest.getParts()

D. servletRequest.getAllParts()

Correct Answer: A

The request.getParts() method returns collections of all Part objects. If you have more than one input of type file, multiple Part objects are returned. Since Part objects are named, the getPart(String name) method can be used to access a particular Part. Alternatively, the getParts() method, which returns an Iterable, can be used to get an Iterator over all the Part objects.
