QUESTION 1

What is true about MySQL Enterprise Transparent Data Encryption (TDE)?

- A. Data is encrypted automatically, in real time, after it is written to storage.
- B. Enables data-at-rest encryption by encrypting the physical files of the database.
- C. Encryption key is stored in a centralized key memory location
- D. Tablespace keys are managed manually behind the scenes.

Correct Answer: B

QUESTION 2

You establish MySQL Enterprise Server on Oracle Cloud Infrastructure connection via Secure Shell (SSH)

For accessing a new MySQL Enterprise Edition on an Oracle Cloud Infrastructure (OCI) Instance you "

Add SSH key " information during the OCI instance setup. You want to use Putty from your Windows Client to install MySQL.

What are the correct steps to accomplish this?

- A. Open Port 22 on your OCI Instance and convert the private key to ppk format. This new private key can be used for authentication.
- B. Use the provided private key for authentication.
- C. Convert the private key to ppk format first and use the new private key for authentication.
- D. Open Port 22 on your OCI Instance and configure Putty with the ssh private key.

Correct Answer: A

QUESTION 3

Which three components can MySQL InnoDB Cluster use to Achieve database high availability?

- A. MySQL Servers with Group Replication to replicate data to all members of the cluster.
- B. MySQL Online Hot Backup to keep data consistent and always ready to be used.
- C. MySQL Shell to create and administer InnoDB Clusters using the built-in AdminAPI.
- D. MySQL X Plugin to enable MySQL to use the X Protocol to speed up and monitor data replication.
- E. MySQL Router to ensure client requests are load balanced and routed to the correct servers.

Correct Answer: ACE
