-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

Which statement is true when the Autonomous Database has auto scaling enabled?

- A. Database concurrency is scaled up when needed by the workload.
- B. Increases the number of sessions available to the database.
- C. Scales the PGA and SGA size when needed for the workload.
- D. Enables the database to use up to 3x CPU/IO resources immediately when needed by the workload.

Correct Answer: D

QUESTION 2

Which workload type does the Autonomous Database on dedicated infrastructure service currently support?

- A. Autonomous Transaction Processing only
- B. ATP and ADW
- C. Autonomous Data Warehouse only
- D. Hybrid Columnar compression

Correct Answer: B

QUESTION 3

Autonomous Database's auto scaling feature allows your database to use up to three times the current base number of CPU cores at any time. As demand increases, auto scaling automatically increases the number of cores in use. Likewise, as demand drops, auto scaling automatically decreases the number of cores in use.

Which statement is FALSE regarding the auto scaling feature?

- A. For databases on dedicated Exadata infrastructure, the maximum number of cores is limited by the number of free cores that aren't being used by other auto scaling databases to meet high-load demands.
- B. The base number of OCPU cores allocated to a database is not guaranteed.
- C. For databases on dedicated Exadata infrastructure, the maximum number of cores available to a database depends on the total number of cores available in the Exadata infrastructure instance.
- D. Auto scaling is enabled by default and can be enabled or disabled at any time.

Correct Answer: B

QUESTION 4

Which statement is true when you provision an Autonomous Database using the cloning method?

- A. After an Autonomous database is created using a clone, the network access option can be changed.
- B. A clone database source can be a running database instance.
- C. A clone database source can be from a point-in-time backup that is less than 2 hours old.
- D. When cloning an Autonomous Database, Oracle Machine Learning workspaces, projects, and notebooks of the source database are cloned to the new database.

Correct Answer: B

QUESTION 5

When working with an Autonomous Exadata Infrastructure supporting Autonomous Databases, where do you go to view the maintenance history of the Exadata?

- A. Under Core Infrastructure then Compute then Autonomous Exadata
- B. Under Solutions and Platform then Platform Services then Autonomous Exadata
- C. Under Database then Autonomous Transaction Processing then Autonomous Exadata
- D. Under Core Infrastructure then Autonomous Exadata

Correct Answer: C

<https://docs.oracle.com/en-us/iaas/Content/Database/Tasks/adbmanaginginfrastructure.htm#viewmaintenancehistory>
<https://docs.oracle.com/en-us/iaas/Content/Database/Tasks/adbmanaginginfrastructure.htm#viewmaintenancehistory>.

Even though the UI has changed recently, this documentation has the user go to Menu-> Database
