QUESTION 1

In which way can a SQL Developer help you test your data loading scenario to Autonomous Database (ADB)?

A. In the TEST phase of the wizard, a subset of accepted records is displayed based on your definition.

B. In the TEST phase of the wizard a list is generated containing the records that would be rejected during import.

C. In the Column Definition Phase, the system cross-references with the file-contents and shows the conflicts with the definition.

D. In the TEST phase, a temporary table will be populated with the records before inserting them in the destination table.

Correct Answer: C

QUESTION 2

Which two statements are true with regards to Oracle Data Sync? (Choose two.)

A. Data Sync can connect to any jdbc compatible source like MongoDB, RedShift and Sybase.

B. Data Sync can use a normal OCI (thick) client connection to connect to an Oracle database.

C. Data Sync can load your data in parallel in order to speed up the loading process.

D. Data Sync has default drivers available that supported loading data from DB2, Microsoft SQL Server, MySQL and Teradata.

Correct Answer: AC
