Your customer wants to synchronize Item Attribute Group definitions for an item class in Oracle Product Hub Cloud with a merchandising system. The customer decided to use the standard publishing capability in Oracle Product Hub Cloud to publish the attributes definition.

Which standard publication feature would you enable to fulfill this requirement?

- A. attribute groups and attributes publication for a spoke system
- B. catalogs publication for an export option
- C. item classes publication for a spoke system
- D. catalogs publication for a spoke system
- E. items publication for a spoke system

Correct Answer: A

QUESTION 3

Your customer wants to add default approvers to their change order workflow, to review and approve proposed item changes. How would you configure this?

- A. Setup and Maintenance > Manage Change Order Types > Edit Workflow tab > Select Approval status line > In Status Details section, Add Default Approvers
- B. Setup and Maintenance > Manage Change Order Types > Edit Change Order > Click the Workflow tab > Select Approval status line > In Status Details section, Add Default Approvers

C. Setup and Maintenance > Manage Change Order Types > Edit Workflow tab > Select Approval status line > Add Default Approvers

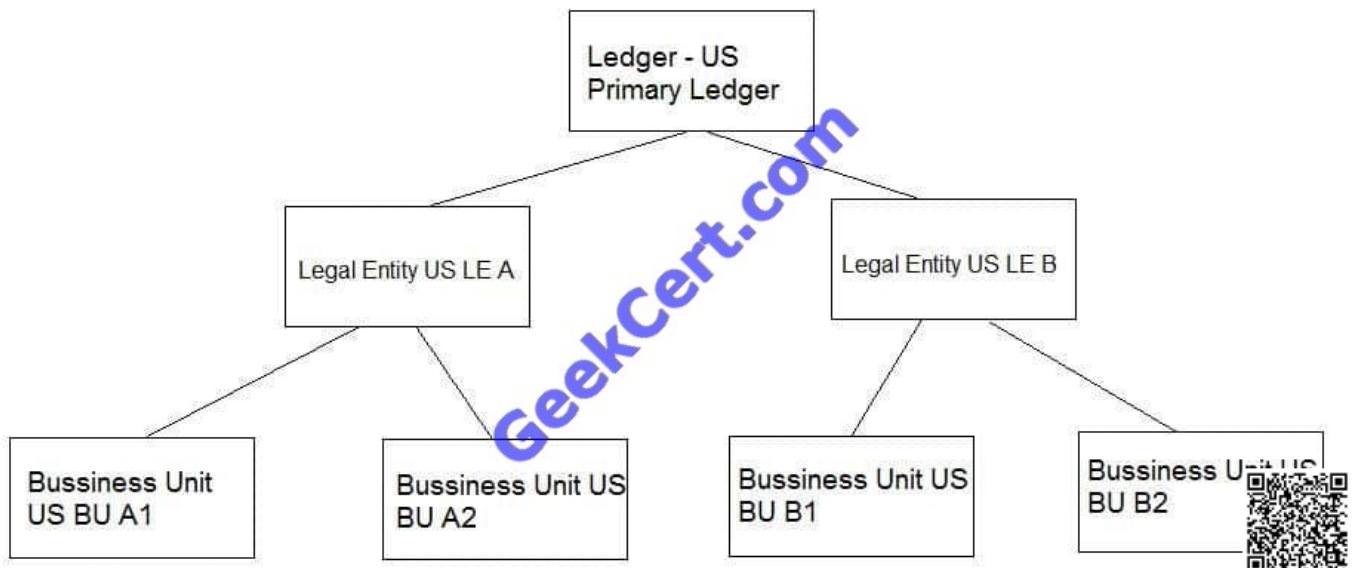

D. Setup and Maintenance > Manage Change Statuses > Select Approval status line > In Status Details section, Add Default Approvers

E. Setup and Maintenance > Manage Change Statuses > Edit Change Order > Click the Workflow tab > Select Approval status line > In Status Details section, Add Default Approvers

Correct Answer: B

QUESTION 4

Your customer is implementing Cloud Applications and their organization structure is described in the following:

They have completed development work and now want to move all configurations along with data to the next instance related to US LE B only, all Business Units perform Financial transactions.

How can this be achieved?

A. While you export, set scope values as US LE A and US LE B, and while you import, set scope as Ledger, US Primary Ledger.

B. While you export, select tasks related to US BU B1 and US BU B2 only.

C. Export everything and while you import, select scope values for US LE A, US BU B1 and US BU B2.

D. While you export, set scope values for US LE B and while you import, it will automatically consider data corresponding to Legal Entity US LE B.

Correct Answer: A

QUESTION 5

Which statement is true about the Integrated Catalog Management component of Oracle Product Hub Cloud?

- A. It shows transactions by customer, product, fulfillment location, supplier, status, and age to authorized users.
- B. The natively integrated real-time and batch data cleansing services reduce any data quality problems at the point of entry.
- C. It modules functional and business categorization of products with master catalogs and shareable categories, which allows reuse of hierarchies and reduces maintenance.
- D. It is a single product data model with extensibility that is leveraged by all Cloud Applications, which eliminates the complex integration and administration overheads that are associated with disparate data models.
- E. It calculates accurate promise dates and highlights the completion of key order processing milestones.

Correct Answer: C
