QUESTION 1

View the exhibit.

You have defined a validation rule to validate an item class change for an item with details as in the Exhibit.

Business	Item
Rule Set Name	ValidateItemClass
Rule Set Type	Validation
Association Type	Item class
Association Name	TCParent
Rule Name	ValidateSourceTargetIC
Severity	Reject
If Expression	TO_ITEM_CLASS("TCCHLDVR") and FROM_ITEM_CLASS("TCPar...
Validation Condition	True
User Message	An item class cannot be changed from TCParent to TCCHLDVR

What is the expected behavior of the validation rule?

A. Item class change from TCCHLDVR to TCParent is rejected and a request for a change order is made.

B. Item class change from TCParent to TCCHLDVR is rejected.

C. Item class change from TCParent to TCCHLDVR is rejected and a change request is triggered automatically.

D. Item class change from TCParent to TCCHLDVR requires a change order.

Correct Answer: B

QUESTION 2

Product data stewards are able to control suppliers access to which three data elements in the Product Hub Portal?

A. Access to items in an Items Class

B. Access to suppliers

C. Supplier-specific Smart Spreadsheet templates for import map

D. Access to all Operational attributes

E. Access to all Extensible Flexfield attributes

Correct Answer: ABD

QUESTION 3

Observe the Mobile Phones item class in the hierarchy shown. You are unable to perform add and remove actions for

one of the security configuration rows under the Item Class People section.

Identify the cause for this behavior.

```
Electronics
    |
    |--Gadgets
    |
    |--Tablets
    |
    |--Laptops
    |
    |--Mobile Phones
```

A. The selectd configuration row is inherited from the Gadgets or Electronics item class.

B. Item class security configurations cannot be modified at all.

C. Item class security configurations can be modified only in Security Console.

D. The item class security configuration is locked for the Mobile Phones item class.

E. The item class security configuration cannot be modified because items already exist under the Mobile Phones item class.

Correct Answer: C

QUESTION 4

During the Design phase of implementing Oracle Product Hub Cloud, you are asked to review the existing processes of Catalog sharing. You decide to add a Category to the Catalog for sharing.

What are the four business benefits of this decision?

A. The Category hierarchy and any assigned items to the Categories in the shared content can be referenced within the Catalog.

B. The complete Category hierarchy in the shared content can be referenced within the Catalog if the items are not assigned to Categories.

C. The referenced content can belong to only one Category if a Category hierarchy exists.

D. The referenced content can belong to more than one Category.

E. The Source Catalog content can be shared with multiple Catalogs.

F. The Catalog contents can be maintained in a single place.

Correct Answer: ADEF

During the creation of the catalog, sharing can be enabled by specifying a single source catalog that will be used for sharing by reference and setting the value of the sharing content to control what content will be shared from the source catalog. The advantage of using sharing by reference is source catalog content can be shared to multiple catalogs and maintained in a single place, the source catalog. In addition, the referenced content can be more than one category, for example a complete category hierarchy and any assigned items to categories in shared content can also be reference within the catalog.

QUESTION 5

Your customer has been using Product Hub and has decided to extend it\\'s manufacturing operations to a new facility. They want to transfer the manufacturing of some of their existing items to this new facility.

Identify the two required setups in Product Hub to support this change.

A. Define Units of Measures

B. Define Item Class Security

C. Define Item or Inventory Organization

D. Define Lifecycle Phases and Assign to Item Class

E. Define Catalogs

F. Define Key Flexfield for Categories

Correct Answer: AE
