The Warehouse Operations Dashboard contains the following KPIs: Inventory Value Hit or Miss Accuracy Exact Matches Rate Inventory Value The Inventory Value KPI shows the total value of inventory owned by your organization. You can also compare inventory value by inventory categories. Hit or Miss Accuracy The Hit or Miss Accuracy KPI shows the percentage of the cycle count that falls within the hit and miss tolerances of a total cycle count. This KPI provides the rate of hits during the cycle counting process. The KPI report enables you to compare the hit or miss accuracy for a selected time period with the prior year's hit or miss accuracy for that same time period. Exact Matches Rate The Exact Matches Rate KPI shows the exact match entries as a percentage of the total cycle count entries. An exact match entry is an entry where the counted quantity entered is the same as the system quantity. The rate of exact match entries obtained during the cycle count is called Exact Matches Rate.
