### QUESTION 1

Which of the following methods will allow you to combine Transaction Lines with matching HTS codes when creating a Declaration?

- A. Set up a Declaration Type Profile for your Declaration.
- B. Set up an Aggregation Constraint Set in your Logic Configuration.
- C. Set up a Grouping Constraint Set in your Logic Configuration.
- D. Set up Data Configuration in your Logic Configuration.

Correct Answer: A

### QUESTION 2

Your client has the following requirement:

1.  
Determine the product classification for a configure-to-order product based on a child-line product classification.

2.

The child-line product classification should be based on the component item's product

3.

If any of the transaction lines have an encrypted product, the product classification at the parent level should be different from the case when none of the child lines have an encrypted product.

Which three setups are required to meet this requirement? (Choose three.)

- A. Develop Agent logic to find the parent product classification based on the child-line product classification.
- B. Link each child line to the parent kit line using a parent line linkage for the Transaction Line.

- C. Maintain the Encrypted Flag as a remark.
- D. Maintain the Encrypted Flag as a product classification type.
- E. Link each child line to the parent kit line by creating remarks for the Transaction Line.
- F. Configure Compliance Rules to find the parent product classification based on the child-line product classification.

Correct Answer: BDF

---
