### QUESTION 1

Your client has the following requirements:

1.  
Perform restricted party screening using first name, last name, address, and country using the DICE algorithm.
2.  
Screen the company name to check if the word NUCLEAR or ATOMIC is part of the company name.

Which option will meet the requirements?

- A. Requirement 1 can be met, but Requirement 2 cannot be met.
- B. Requirements can be met by configuring separate Service Preference and Service Parameter, and by making multiple restricted party screening requests using an agent.
- C. Requirements can be met by configuring multiple Service Parameters in a single Service Preference and by calling the restricted party screening using an agent with the service preference.
- D. Requirements can be met with a custom stored procedure for requirement 2 along with a restricted party screening for requirement 1, because ONLY ONE restricted party screening request can be made using an agent.

Correct Answer: B

---

### QUESTION 2

Your client wants to replace a product classification code with a new product classification code for all items with an item remark qualifier of ENCRYPTED and value set to Y. Which two design and configuration options meet this requirement? (Choose two.)

- A. Create a saved query to identify the item with an item remark qualifier of ENCRYPTED and the value set to Y, and develop agent logic to search and replace the product classification code.
- B. Create a saved query to identify the item with an item remark qualifier of ENCRYPTED and the value set to Y, and use the saved query with the recurring process Update Product Classification to update the items based on old and new product classification code.
- C. Create a product classification template with the new product classification code, use the UI to select multiple items that meet the criteria based on the remark and old classification code, and assign the new product classification template.
- D. Create a product classification template with the new product classification code and use agent logic to update all items with the old product classification code for any item that has the item remark qualifier of ENCRYPTED and the value set to Y and has the old code.

Correct Answer: BC

---

### QUESTION 3

The Shipments-Imports and Shipments-Export dashboards enable you to select the time period you want to report on. If the time period is not changed, what's the default setting?

- A. Prior month's shipments
- B. Prior quarter's shipments
- C. Prior week's shipments
- D. All shipments

Correct Answer: D

---

#### QUESTION 4

Identify two objects that need to be set up in GTM when you want to receive a new tariff containing classification data into GTM. (Choose two.)

- A. Data Version
- B. Data Load Type
- C. Product Classification Type
- D. Content Set

Correct Answer: CD

---

#### QUESTION 5

Which three fields on the User Manager screen need to be populated to provide a new user access to GTI? (Choose three.)

- A. Account Policy ID
- B. User Role ID
- C. Document Use Profile
- D. Business Intelligence Role ID
- E. Business Intelligence Application ID

Correct Answer: BCE
