#### QUESTION 5

Measuring components are either subtractive or consumptive. Which statement correctly describes these two concepts?

- A. Subtractive measuring components are associated only with water service, whereas consumptive measuring components are for gas and electric services.
- B. Subtractive measuring components are used to measure demand, whereas consumptive measuring components are used to measure how much was consumed since the previous reading.
- C. Subtractive measuring components are associated with deductive meters, whereas consumptive measuring components are not.
- D. A subtractive measuring component's consumption for a given period of time is the end measurement minus the start measurement. A consumptive measuring component's consumption is simply the measurement itself, and represents the consumption for the period of time since the previous measurement was taken.

Correct Answer: B
