QUESTION 1

Which describes derived values and their relationship with Final Measurements?

- A. Final Measurements can have multiple derived values, which represent other values for the same Final Measurement Date/Time.
- B. Derived values can have multiple Final Measurements, which represent other values for the same Initial Measurement Date/Time.
- C. Final Measurements can have one derived value, which represents an alternative for the same Final Measurement Date/Time.
- D. Final Measurements can have one derived value, which represents the Initial Measurement for the same Final Measurement Date/Time.

Correct Answer: D

QUESTION 2

Which statement is true about specifications?

- A. Specifications include the inspection history of an asset.
- B. Specifications apply only to assets and not to components.
- C. Specifications can include peer specifications.
- D. A single specification can only be used on one asset.

Correct Answer: D

QUESTION 3

New: An electric utility is starting an Advanced Meter Infrastructure (AMI) roll-out for their residential customers. The initial plan is to roll out devices from their manufacturer with potentially three different device models. The customer has not decided what head-end systems they will use to communicate with these devices. Based on the customer's initial roll-out strategy, the devices will have to be configured consistently to support existing tariffs for billing.

Which is a valid consideration to determine the setup of device type administrative data for this implementation?

- A. billing usage rules
- B. the model number
- C. the device's date of manufacturer
- D. valid head-end systems, valid device configuration types, and the electricity service type

Correct Answer: C

QUESTION 4

Usage transactions can contain date breaks. Which is used to supply date breaks?

- A. the Deferred Monitor Calculation Algorithm
- B. the Usage Subscription Type
- C. the requesting system or user input
- D. the Usage Subscription BO

Correct Answer: B

QUESTION 5

Which three statements are true about the different types of measuring components? (Choose three.)

- A. Seconds-per-interval (SPI) is one of the attributes of scalar measuring components.
- B. Only physical measuring components reference a device configuration.
- C. The terms register and channel are synonyms for measuring component.
- D. The measuring component types are physical, standalone, scratchpad, and TOU.
- E. Scalar measuring components contain a single measurement for an arbitrary period of time.

Correct Answer: CDE
