**QUESTION 1**

Refer to the exhibit.

Based on the information given, which switch will be elected root bridge and why?

A. Switch A, because it has the lowest MAC address

B. Switch A, because it is the most centrally located switch

C. Switch B, because it has the highest MAC address

D. Switch C, because it is the most centrally located switch

E. Switch C, because it has the lowest priority

F. Switch D, because it has the highest priority

Correct Answer: E

To elect the root bridge in the LAN, first check the priority value. The switch having the lowest priority will win the election process. If Priority Value is the same then it checks the MAC Address; the switch having the lowest MAC Address will become the root bridge. In this case, switch C has the lowest MAC Address so it becomes the root bridge.

**QUESTION 2**

Which two EXEC mode commands can simplify DHCP lease management? (Choose two)

A. release dhcp

B. no ip dhcp conflict logging

C. Renew dhcp

D. ip address dhcp

E. ip dhcp ping timeout 500

Correct Answer: AC

**QUESTION 3**

What OSPF command, when configured, will include all interfaces into area 0?

A. network 0.0.0.0 255.255.255.255 area 0

B. network 0.0.0.0 0.0.0.0 area 0

C. network 255.255.255.255 0.0.0.0 area 0

D. network all-interfaces area 0

Correct Answer: A

Example 3-1 displays OSPF with a process ID of 1 and places all interfaces configured with an IP address in area 0. The network command network 0.0.0.0 255.255.255.255 area 0 dictates that you do not care (255.255.255.255) what the IP address is, but if an IP address is enabled on any interface, place it in area 0. Example 3-1 Configuring OSPF in a Single Area router ospf 1

network 0.0.0.0 255.255.255.255 area 0

**QUESTION 4**

What are three reasons to collect Netflow data on a company network? (Choose three.)

A. To identify applications causing congestion.

B. To authorize user network access.

C. To report and alert link up / down instances.

D. To diagnose slow network performance, bandwidth hogs, and bandwidth utilization.

E. To detect suboptimal routing in the network.

F. To confirm the appropriate amount of bandwidth that has been allocated to each Class of Service.

Correct Answer: ADF

NetFlow facilitates solutions to many common problems encountered by IT professionals. + Analyze new applications and their network impact Identify new application network loads such as VoIP or remote site additions.

+

 Reduction in peak WAN traffic

Use NetFlow statistics to measure WAN traffic improvement from application-policy changes; understand who is utilizing the network and the network top talkers. + Troubleshooting and understanding network pain points Diagnose slow

network performance, bandwidth hogs and bandwidth utilization quickly with command line interface or reporting tools. -> D is correct.

+

Detection of unauthorized WAN traffic

Avoid costly upgrades by identifying the applications causing congestion. -> A is correct.

+

Security and anomaly detection

NetFlow can be used for anomaly detection and worm diagnosis along with applications such as Cisco CS-Mars.

+

Validation of QoS parameters

Confirm that appropriate bandwidth has been allocated to each Class of Service (CoS) and that no CoS is over- or under-subscribed.-> F is correct.

---

**QUESTION 5**

which layer of the osi model does PPP perform ?

A. Layer 2

B. Layer 3

C. Layer 5

D. Layer 1

Correct Answer: A
