QUESTION 1

A customer wants to analyze the data rates that are available to a corporate laptop in its wireless deployment. The customer wants a heat map that displays actual data and shows the data rates that are available to the client in different areas of its facility. When using AirMagnet Survey PRO, which type of survey provides the actual data rates?

A. virtual

B. predictive

C. passive

D. active

Correct Answer: D

QUESTION 2

Refer to the exhibit. Which command was given in the wireless controller to display the active clients that are associated with an access point?

A. show ap clients

B. show client active all

C. show 802.11 association

D. show client summary

Correct Answer: D

QUESTION 3

You are configuring SNMPv1/v2c on a WLC. What should you do for improved security?

A. Remove the default SNMPv1 community.

B. Remove the default SNMPv1 and SNMPv2 communities.

C. Remove the default SNMPv2 community.

D. Remove the default SNMPv3 users.

Correct Answer: B

The controller has commonly known default values of "public" and "private" for the read-only and read-write SNMP community strings. Using these standard values presents a security risk. If you use the default community names, and since

these are known, the community names could be used to communicate to the controller using SNMP. Therefore, we strongly advise that you change these values.

Step 1

Choose Management and then Communities under SNMP. The SNMP v1 / v2c Community page appears.

Step 2

If "public" or "private" appears in the Community Name column, hover your cursor over the blue drop-down arrow for the desired community and choose Remove to delete this community.

Step 3

Click New to create a new community. The SNMP v1 / v2c Community > New page appears.

Step 4

In the Community Name text box, enter a unique name containing up to 16 alphanumeric characters. Do not enter "public" or "private." Step 5

In the next two text boxes, enter the IPv4/IPv6 address and IP Mask/Prefix Length from which this device accepts SNMP packets with the associated community and the IP mask.

Step 6

Choose Read Only or Read/Write from the Access Mode drop-down list to specify the access level for this community.

Step 7

Choose Enable or Disable from the Status drop-down list to specify the status of this community.

Step 8

Click Apply to commit your changes.

Step 9

Click Save Configuration to save your settings.

Step 10

Repeat this procedure if a "public" or "private" community still appears on the SNMP v1 / v2c Community page.

QUESTION 4

What three roles are defined by 802.1X? (Choose three.)

A. AAA Server

B. Authenticatee

C. Authenticator

D. Authentication Server

E. Supplicant

Correct Answer: CDE

QUESTION 5

What encryption standards describe WPA and WPA2?

A. WPA mandates AES with TKIP optional, WPA2 mandates TKIP

B. WPA mandates TKIP with AES optional, WPA2 mandates AES

C. WPA mandates CKIP, WPA2 mandates AES

D. WPA mandates CKIP with AES optimal, WPA2 mandates AES

Correct Answer: B
