QUESTION 1

When using Network Performance Management solutions for WAN management, network managers are typically most interested in:

- A. Bandwidth Utilization and Storage Utilization
- B. Encryption Algorithms used
- C. Signal to Noise Ratio of Fiber Optic Links
- D. User Access Roles per Data Set
- E. Bandwidth Utilization and Application Performance

Correct Answer: E

QUESTION 2

Cascade Profiler is able to report traffic using two different approaches (centricities). Two approaches can result in different results when using the same report criteria due to the way data is aggregated and counted. What are these two approaches? (Select 2)

- A. Interface centric
- B. Application centric
- C. Host centric
- D. Port centric
- E. The Cascade Profiler does not have two approaches

Correct Answer: AC

QUESTION 3

Simple Network Management Protocol can be used on Cascade Profiler for:

- A. Obtaining interface information from routers.
- B. Obtaining interface information from user PCs.
- C. Obtaining user PC status through the Cascade Profiler receiving SNMP traps.
- D. Obtaining network device status through the Cascade Profiler receiving SNMP traps.
- E. All of the above.

Correct Answer: A

QUESTION 4

Alerts triggered in Cascade Profiler are distributed to recipients by Cascade Profiler using which mechanism(s): A. None, alerts are accessible via the Cascade GUI only

B. SNMP traps only

C. SMTP email only

D. Pager only

E. One of SMTP email or SNMP trap but not both

F. SNMP traps and SMTP mail, each one optional, both allowed

Correct Answer: F

QUESTION 5

What are the features available in Cascade Pilot that are NOT available in Cascade Pilot Personal Edition (PE)? (Select 3)

A. Drill down from Cascade Profiler

B. Indexing files for fast analysis

C. Visual troubleshooting and analysis

D. Distributed capture and analysis (Cascade Shark appliance)

E. Application Transaction diagrams

Correct Answer: ADE
