QUESTION 1

VCE support asks you to collect VMware diagnostic logs from an ESXi host.

Which two management tools would you use to accomplish this task? (Choose two.)

- A. vSphere Client connected to ESXi host
- B. VMware Update Manager (VUM) server
- C. vSphere client connected to vCenter Server
- D. VMware vCenter SQL database

Correct Answer: AC

QUESTION 2

A host is a member of a high availability (HA) cluster in vCenter. There is a failure of a B-series blade in a Vblock System 720.

What are three ways that vCenter is impacted? (Choose three.)

- A. vCenter will recognize the host's absence and high availability will restart the virtual machines on the remaining hosts depending on resource constraints.
- B. The vCenter virtual machine will restart on another available host, there will be no impact to production data on the Vblock.
- C. vCenter will use Distributed Resource Scheduling (DRS) to vMotion virtual machines based on the reduced resources available.
- D. The outage will require remediation to restore vCenter functionality.
- E. The amount of resources available to the cluster will be reduced until the outage is restored.

Correct Answer: ACE

QUESTION 3

During a Vblock System logical build, which three configuration changes require Unified Computing System Manager (UCSM) access? (Choose three.)

- A. fabric interconnect interfaces
- B. ESXi host Network Time Protocol
- C. service profiles
- D. Cisco Nexus 1000V

E. UCS Smart Call Home

Correct Answer: ACE

QUESTION 4

What are three core VMware components of a Vblock System? (Choose three.)

- A. vCenter server
- B. Update Manager
- C. ESRS
- D. ESX
- E. ESXi

Correct Answer: ABE

QUESTION 5
