QUESTION 1

A customer calls complaining that their CDDVD drive is no longer accessible on their virtual server. After investigating, you notice their virtual server is configured for VMware Fault Tolerance enabled. Which condition would cause this situation to occur?

- A. The secondary node has Connect at power on disabled.
- B. The secondary node has Use a physical drive selected.
- C. The source ISO is not on shared storage.
- D. The auto detect option is not selected.

Correct Answer: C

QUESTION 2

VMware vCenter Server provides which three functions? (Choose three.)

- A. multi-pathing
- B. cloning of virtual machines
- C. VMware vMotion
- D. template creation
- E. Active Directory LDAP services

Correct Answer: BCD

QUESTION 3

You would like to upgrade Update Manager and keep your current database. What will allow you to meet this requirement?

- A. Upgrade the Update Manager plug-in prior to upgrading the Update Manager Server.
- B. During the upgrade process, a backup of the Update Manager database will be taken automatically.
- C. Within the Update Manager plug-in, backup the existing Update Manager database.
- D. During the upgrade process, make a backup of the existing Update Manager database.

Correct Answer: D

QUESTION 4

You power on a Vblock System 320 and look at the Maps tab of an ESXi server in vCenter\\'s Hosts And Clusters view and see an ESXi server with a red "x" over it.

What is causing the ESX server problem?

- A. The server has crashed.
- B. The server is an unsuitable candidate for migration.
- C. The data store is out of space.
- D. The server is rebooting.

Correct Answer: B

QUESTION 5

Your client wants space required for the virtual disk to be allocated when the virtual disk is created. Also, any data remaining on the physical device should not be erased during creation, but be zeroed out on demand, at a later time, on the first write from the virtual machine. Which storage provision type would you use to meet the client\\'s requirements?

- A. thick LUN provisioning, eager zeroing
- B. thin LUN provisioning, eager zeroing
- C. thin LUN provisioning, lazy zeroing
- D. thick LUN provisioning, lazy zeroing

Correct Answer: D
