### QUESTION 1

Your client wants all required storage space for the virtual disk to be allocated at creation time. The data remaining on the physical device should be zeroed out when the virtual disk is created. Which storage provision type will allow you to meet your client's requirements?

- A. thick LUN provisioning, eager zeroing
- B. thin LUN provisioning, eager zeroing
- C. thin LUN provisioning, lazy zeroing
- D. thick LUN provisioning, lazy zeroing

Correct Answer: A

---

### QUESTION 2

A user must be granted a virtual machine administrator role on all hosts with the ability to only take snapshots of VM1 on ESXi02.

Which two steps are required to accomplish this task? (Choose two.)

- A. At the vCenter level, add the user to the virtual machine administrator role.
- B. From each vSphere host, assign the user to the virtual machine administrator role, and ensure all privileges have been granted.
- C. At the virtual machine level, ensure the ability to take snapshots is allowed, and all other privileges are unselected on VM1.
- D. At the host and cluster level, ensure the ability to take snapshots is allowed, and all other privileges are unselected on VM1.

Correct Answer: AC

---

### QUESTION 3

A customer calls complaining that their CDDVD drive is no longer accessible on their virtual server. After investigating, you notice their virtual server is configured for VMware Fault Tolerance enabled. Which condition would cause this situation to occur?

- A. The secondary node has Connect at power on disabled.
- B. The secondary node has Use a physical drive selected.
- C. The source ISO is not on shared storage.
- D. The auto detect option is not selected.

Correct Answer: C

---

#### QUESTION 4

A VM on the Vblock System 320 is unable to communicate on the customer network. When examining the virtual machine, you notice it has the same port group as the other VMs on the same ESXi server. Which action must you perform to resolve the problem?

- A. You must reboot the VM.
- B. You must restart the network agents on the ESX server.
- C. You must verify that the VM's network adapter is connected.
- D. You must install the Nexus 1000V agent on the virtual machine.

Correct Answer: C

---

#### QUESTION 5

Which three disk formats would be used on an NFS data store? (Choose three.)

- A. thin
- B. thick
- C. 2gbsparse
- D. eagerzeroedthick
- E. rdmp

Correct Answer: ABC
