Correct Answer: D

QUESTION 4

A network administrator is asked to configure a video conference using the Cisco TelePresence MCU 5300. There is a requirement for participants to start with the same layout when joining the conference. How can this goal be

accomplished?

- A. Layouts cannot be customized on the MCU 5300.
- B. Configure a custom layout for each user individually.
- C. Configure a custom layout and apply the layout to all new participants.
- D. Allow each endpoint to configure its own layout.

Correct Answer: C

Controlling the layout When a participant joins a conference, their screen layout is typically determined by the default view set for the MCU. It is also possible to set the layout for all of the conference participants on the conference's Custom Layout page. The breadcrumb trail shows you which conference you are working with.
