QUESTION 1

You are making some changes in connectivity in your network layer and are concerned about the port licensing on your Fabric Interconnect.

If you disable a port, which statement is true?

- A. You must log into the Fabric Interconnect to de-authorize the license assigned to that port.
- B. You must edit the license file on the Fabric Interconnect to specify which license is now free.
- C. The licenses are dynamically added back to the license pool.
- D. You must force a license rescan on your UCS to recapture the license.

Correct Answer: C

QUESTION 2

Which protocol is used to provide block storage connectivity in a Vblock® System 200?

- A. FCoE
- B. NFS
- C. iSCSI
- D. FC

Correct Answer: D

QUESTION 3

Your VMware administrator is asked to assign more storage to a virtual machine but does not have sufficient capacity available on the existing data stores.

Which three steps would you perform to assign the requested storage? (Choose three)

- A. Create a data LUN on the storage array.
- B. Create a new data storage pool on the storage array.
- C. Assign a data LUN to the ESXi host groups.
- D. Assign a new data storage pool to the ESXi host groups.
- E. Rescan storage and create a new data store.

Correct Answer: ACE

QUESTION 4

You have added physical disks to your Vblock® System 720 to a physical disk group and then created data devices.

What must you do to see the new capacity?

- A. Add the devices to the masking group.
- B. Map the devices to the front end ports.
- C. Add the devices to the thin pool and enable them.
- D. Add the devices to the FAST VP policy.

Correct Answer: C

QUESTION 5

You are asked to create a series of LUNs within a storage pool that will be used as VMFS data stores and you are unsure what the performance requirements will be.

According to EMC, which FAST Tiering Policy should you use?

- A. Auto-Tier
- B. Start High then Auto-Tier
- C. Highest Available Tier
- D. Lowest Available Tier

Correct Answer: B
