### QUESTION 1

You receive a high priority new VM request that requires the creation of redundant VMs with host redundancy.

Which vCenter task must be performed to satisfy this requirement?

- A. Configure host and VM monitoring.
- B. Configure a VM-Hosts affinity rule in vSphere DRS.
- C. Configure a custom VM monitoring rule in vSphere HA.
- D. Configure a VM-VM affinity rule in vSphere DRS.

Correct Answer: D

---

### QUESTION 2

While managing a Vblock® System 340 you monitor the system for optimal performance configuration. Which VNX storage performance characteristic should be viewed to confirm expected storage behavior?

- A. Verify that mission critical data is accessed from EFD.
- B. Verify that the workload is balanced across the storage processors.
- C. Verify that the storage processors are configured with the same amount of cache.
- D. Verify that small and large I/Os are targeted to different storage processors.

Correct Answer: B

---

### QUESTION 3

What are three supported disk types for a Vblock® System 720? (Choose three)

- A. EFD
- B. FC
- C. SAS
- D. SATA
- E. NL\_SAS

Correct Answer: ABD

---

### QUESTION 4

An application owner complains about poor application performance since the application was moved to the Vblock® System 340. Your VMware administrator determines that the storage used for this application has a very high latency. Which step would you take to gather information from your storage array to send to EMC technical support?

- A. Generate a diagnostic file for each storage processor in Unisphere.
- B. Generate a diagnostic file for each block pool in Unisphere.
- C. Create a support bundle for each RAID group in Unisphere.
- D. Create a support bundle for the FAST cache in Unisphere.

Correct Answer: A

#### QUESTION 5

You are adding a new VLAN to your Vblock® System 340. You create the VLAN on both your Nexus 5000 series switches.

Which two steps are required before this VLAN should be used? (Choose two)

- A. Add the VLAN to an untagged port channel.
- B. Add the VLAN to the port channel between the Nexus 5000 switches and Fabric Interconnects.
- C. Add the VLAN to the port channel joining the Nexus 5000 switches.
- D. Create a new port channel between the Nexus 5000 switched and Fabric Interconnects with the new VLAN.

Correct Answer: BC
