QUESTION 1

A user states that they see a warning on their screen about an IP conflict. Which of the following is MOST likely the cause?

- A. A static IP address is assigned to the workstation
- B. A bad router
- C. A bad switch
- D. The computer is getting an APIPA address

Correct Answer: A

QUESTION 2

A company would like to implement multifactor authentication for all employees at a minimal cost. Which of the following best meets the company's requirements?

- A. Biometrics
- B. Soft token
- C. Access control lists
- D. Smart card

Correct Answer: B

QUESTION 3

Which of the following can be used to help recover a lost smartphone?

- A. Remote support software
- B. Locator application
- C. NFC enabled device
- D. GPS navigation software

Correct Answer: B

QUESTION 4

A company discovered that numerous computers from multiple geographic locations are sending a very high number of connection requests which is causing the company's web server to become unavailable to the general public. Which of the following attacks is occurring?

- A. Zero day
- B. SOL injection
- C. Cross-site scripting
- D. Distributed denial of service

Correct Answer: D

The company is experiencing a distributed denial of service (DDoS) attack. A DDoS attack is a type of cyber attack in which multiple compromised systems are used to target a single system, causing a denial of service for users of the targeted system.

QUESTION 5

Before leaving work, a user wants to see the traffic conditions for the commute home. Which of the following tools can the user employ to schedule the browser to automatically launch a traffic website at 4:45 p.m.?

- A. taskschd.msc
- B. perfmon.msc
- C. lusrmgr.msc
- D. Eventvwr.msc

Correct Answer: A

The user can use the Task Scheduler (taskschd.msc) to schedule the browser to automatically launch a traffic website at 4:45 p.m. The Task Scheduler is a tool in Windows that allows users to schedule tasks to run automatically at specified times or in response to certain events.
