QUESTION 1

A Symantec NetBackup administrator configures a Standardpolicy type for synthetic backups. What is required for a successful Synthetic Full if the client is offline?

- A. successful traditional Full and Synthetic Incremental backup
- B. bring the client online, successful traditional Full and Incremental backup
- C. bring the client online, successful traditional Full and Synthetic Incremental backup
- D. successful traditional Full and Incremental backup

Correct Answer: D

QUESTION 2

An organization plans to upgrade its master server to Symantec NetBackup 7.5. A Symantec NetBackup media server is being used to perform a backup of the catalog. Which Symantec NetBackup version or versions are supported on the media server performing the catalog backup?

- A. 6.5, 7.0, or 7.1
- B. 7.5 only
- C. 7.1 or 7.5 only
- D. 7.0, 7.1, or 7.5

Correct Answer: B

QUESTION 3

Which setting causes poor deduplication rates?

- A. maximum fragment size
- B. deduplication compression
- C. deduplication encryption
- D. policy-based compression

Correct Answer: D

QUESTION 4

Refer to the exhibit.

An organization has the requirements listed below for a server's backup data. Two copies must be retained for the same backup data. One copy must be sent to disk with a retention period of one month. A second copy must be sent to tape with a retention period of six months. The copy on disk may only be automatically deleted by Symantec NetBackup after one month. This must be configured without use of storage lifecycle policies. How can a Symantec NetBackup 7.5 administrator configure a backup policy, maximizing automation, to meet these requirements?

- A. create a basic disk staging storage unit with a fixed retention of one month and staging to tape with a retention of six months; configure the backup policy to use this disk
- B. configure the backup policy to back up to a basic disk with retention of one month; run the `bpduplicate` command to duplicate to tape with retention of six months
- C. configure two identical schedules for the same policy, then configure one schedule to go to a basic disk with retention of one month and configure the other schedule to go to tape with retention of six months
- D. configure the backup policy so that the schedule creates multiple copies: one to basic disk with one month retention, and one to tape with six months retention

Correct Answer: D

QUESTION 5

An organization protects Windows clients with archive bit selected. The organization runs full backups weekly on Friday. Daily incrementals run nightly for the rest of the week. An administrator had to perform a full catalog recovery on Wednesday. How should the administrator proceed?

- A. expire the older catalog backup images
- B. modify the schedules to run backups immediately
- C. perform an immediate catalog backup
- D. perform a manual full backup for the clients

Correct Answer: D
