QUESTION 1

A robotic library is shared by multiple departments.

How can the library be managed so that each department can be charged for particular groups of tapes?

- A. create a media set for each department
- B. create a partition for each department
- C. label the media for each department
- D. catalog the media for each department

Correct Answer: B

QUESTION 2

What is the default media set configured in Job Defaults for Back Up to Tape?

- A. Scratch Media
- B. Keep Data For 4 Weeks
- C. Keep Data Infinitely - Do Not Allow Overwrite
- D. Foreign Media

Correct Answer: B

QUESTION 3

An administrator needs to use Symantec Backup Exec 2014 to protect a VMware environment. The data store containing the VMware virtual machines is located on SAN disk storage. The Symantec Backup Exec 2014 server is also connected to the SAN infrastructure. The administrator needs to restrict the flow of

backup data such that it always travels over the SAN. How should the administrator proceed?

- A. enable forced SAN mode on the VMware vCenter server
- B. select the NBD transport option in backup properties
- C. use the transport mode priority list option to only select SAN transport mode
- D. enter the IP Address of the SAN data storage server

Correct Answer: C

QUESTION 4

Which default tape drivers are installed with Symantec Backup Exec 2014 on Windows 2012 and later?

- A. user-mode tape drivers
- B. kernel-mode tape drivers
- C. kernel-mode and user-mode tape drivers
- D. native Windows drivers

Correct Answer: A

QUESTION 5

Which two conditions cause Data Discovery to fail to detect remote servers in the same domain as the Symantec Backup Exec server? (Select two.)

- A. The administrator failed to add the default logon account to the local administrators group on the remote servers
- B. The servers have Windows Management Instrumentation (WMI) disabled
- C. The firewall on the remote servers is configured to block WMI traffic
- D. The firewall on the remote servers is configured to block port 10000
- E. The remote servers have an old version of the Symantec Backup Exec Remote Agent installed

Correct Answer: BC
