QUESTION 1

What is the correct sequence of steps to install the Symantec NetBackup 7.5 Windows master server software?

- A. verify prerequisites, install the Symantec NetBackup Environment Checker, install NetBackup, run the Environment checker
- B. verify prerequisites, install Symantec NetBackup, run the Windows post-installation Environment Checker
- C. verify prerequisites, install Symantec NetBackup, run the Windows pre-installation Environment Checker
- D. verify prerequisites, run the Windows pre-installation Environment Checker, install Symantec NetBackup

Correct Answer: D

QUESTION 2

Which two statements accurately describe a user archive operation in Symantec NetBackup 7.5? (Select two.)

- A. Restores are performed using bpcatlist and bpcatres.
- B. The archived image reduces the size of the Symantec NetBackup 7.5 catalog image database.
- C. The policy must be named user-archive.
- D. An administrator is unable to manually initiate the job from the Symantec NetBackup Administration Console.
- E. The policy backup selection list is ignored.

Correct Answer: DE

QUESTION 3

Which cleaning method should be used when robotic-automatic cleaning is unsupported?

- A. library-based cleaning
- B. TapeAlert cleaning
- C. frequency-based cleaning
- D. calendar-based cleaning

Correct Answer: C

QUESTION 4

An administrator has successfully recovered all Symantec NetBackup 7.5 catalogs, which used the only two catalog backup tapes. A number of backups have taken place and a catalog backup is run automatically. The catalog backup fails with an error code 96. The administrator investigates and discovers that all of the tapes have been allocated.

What is the cause of this error?

- A. The catalog recovery freezes the catalog tapes.
- B. The catalog recovery suspends the catalog tapes.
- C. The catalog recovery freezes the catalog tapes in the NBU-Catalog volume pool.
- D. The catalog recovery suspends the catalog tapes in the NBU-Catalog volume pool.

Correct Answer: A

QUESTION 5
