- ⚙️ **800,000+** Satisfied Customers

QUESTION 1

A group of computers are received from a computer manufacturer with a list of corresponding MAC addresses. To facilitate the imaging of the computers, the list is modified and then imported to Deployment Solution, creating new computer accounts. In a lab, all computers are started and booted into WinPE automation. In the console, a job is assigned to each computer appropriate to its hardware; but the computers never get the tasks or run the jobs. What is a likely reason for this behavior?

- A. The number of concurrent tasks assigned for imaging is overwhelming the SQL server.
- B. The computer records in the database are missing necessary key information to properly identify the computers.
- C. The network addresses assigned to the computers in the lab are outside the SBS configured ranges.
- D. New computers must first check in and be given a GUID in the console before being assigned a name and corresponding jobs or tasks.

Correct Answer: B

QUESTION 2

An administrator is looking at a Patch Management Compliance report listing several computers requiring Microsoft patches. Which two steps are required to update the computers with the required patches? (Select two.)

- A. Import all listed updates into a filter.
- B. Right-click each update and select "Stage".
- C. Create a policy for each listed patch using the wizard.
- D. Right-click each computer and select "Update Computer".
- E. Import all listed computers into a target.

Correct Answer: BC

QUESTION 3

Which two are required for full use of the Symantec Management Console? (Select two.)

- A. Java Runtime Environment
- B. Adobe Shockwave
- C. Microsoft Silverlight
- D. Adobe Air
- E. Windows Deployment Services

Correct Answer: AC

QUESTION 4

Which statement is true about the Application Metering feature of Inventory Solution?

- A. It tracks and compares changes to application files and registry keys.
- B. It monitors and denies the usage of applications on the network.
- C. It gathers detailed information about application files.
- D. It limits the usage of applications to purchased licenses.

Correct Answer: C

QUESTION 5

An administrator receives notification of a new vulnerability threat from Symantec Deepsight Alert Services. The alert includes the name of an executable that should be prevented from running. Which policy should the administrator configure?

- A. Malware Blocking policy
- B. Application Metering policy
- C. Custom Inventory policy
- D. Software Inventory policy

Correct Answer: A
