QUESTION 1

The Delta Hardware Inventory policy is configured to run daily at 18:00. The Delta Software Inventory policy is configured to run weekly on Mondays at 18:00. Both policies are enabled for all managed computers. What will happen on Mondays at 18:00?

- A. Both policies will run simultaneously, only reporting their uniquely different information.
- B. Both policies will run simultaneously, reporting all their overlapping information.
- C. The weekly task will run on Monday and the daily task will be postponed until its next scheduled run on Tuesday.
- D. One policy will run and the second policy will start once the first completes.

Correct Answer: D

QUESTION 2

An administrator wants to upgrade a user's computer from Windows XP to Windows 7, incorporating PC Transplant. The administrator needs to limit the amount of data to be copied across the network during this process. Which configuration option allows the administrator to accomplish this?

- A. file preservation
- B. file filter
- C. image file
- D. A2i file

Correct Answer: A

QUESTION 3

A virtual package on a client computer is corrupted. What is the procedure by design to fix the problem?

- A. Deactivate and Reset
- B. Delete and Reset
- C. Deactivate and Reinstall
- D. Reset and Reinstall

Correct Answer: A

QUESTION 4

Altiris Client Management Suite 7.1 Solutions (such as Patch Management Solution, Inventory Solution, and Software

Delivery Solution) have been integrated into the Software Management Framework. What is a benefit of this integration?

- A. It allows all applications installed on the framework to be accessed by all solutions.
- B. It allows different versions of an application installed on the framework to run side by side.
- C. It allows all solutions built on the framework to eliminate duplication of work and data.
- D. It allows all solutions built on the framework to use different sets of resources.

Correct Answer: C

QUESTION 5

Which limitations are placed on software information collected using a Standalone Inventory task on an unmanaged 64-bit computer?

- A. Because the Standalone package lacks native 64-bit support, only 32-bit programs are reported.
- B. References to the Software Catalog are missing for the unmanaged computer.
- C. Any patches staged in Patch Management are removed from the inventory results for the computer.
- D. License information is limited to Microsoft products only.

Correct Answer: B
