QUESTION 1

How can greater efficiency and consistency be achieved when deploying multiple Managed Software Delivery policies to endpoints?

A. Update the Managed Delivery Settings policy to define standard default settings for new Managed Delivery policies.

B. Configure and run the Update Managed Delivery Policies task to reconfigure Managed Software Delivery policies with default settings.

C. Configure the Default Software Settings policy to specify standardized settings for newly created Managed Software Delivery policies.

D. Enable the Synchronize Software Policies scheduled task to update existing Managed Software Delivery policies with predefined settings.

Correct Answer: A

QUESTION 2

A school with a limited budget either receives computers as donations or buys them in small quantities. As a result, the school has several varieties of computers and associated hardware. Each quarter, all student computers must be reset to a fresh state to prepare for the next group of students. When the computers are reset, the OS is manually installed, all of the drivers for each unique system are installed, and each application is installed one at a time by CD. The process is cost effective, but highly prone to error and often results in several days of clean-up by the teachers. Which two benefits would the school realize by using Deployment Solution? (Select two.)

A. It can automate the application installations through use of the Software Portal.

B. It can install the operating systems automatically using a Scripted OS Installation.

C. It can manage the drivers for each system through use of Prepare the Image tasks.

D. It can install the operating system automatically through use of PC Transplant.

E. It can automate the application installations through use of Restore Software tasks.

F. It can automate driver installation through use ofDeploy Anywhere.

Correct Answer: BF
