QUESTION 1

A Case Team is managing a project with tight deadlines. Several attorneys are waiting to perform a search and review of documents. The Case Team believes some image-based documents in the population require OCR in order to be made searchable. Which workflow in Symantec Clearwell eDiscovery Platform 7.x should the Case Team follow to run OCR on this data population?

- A. Enable OCR processing on the processing settings page, thereby increasing efficiency by applying OCR in one step.
- B. Ensure OCR processing is disabled on the processing settings page. Once initial processing is complete, run a search to identify items that need OCR and run a secondary OCR processing job on those items.
- C. Enable OCR processing on the processing settings page, but be sure to exclude images that are being imported via Load File Import. These items may already have associated text files.
- D. Enable OCR processing on the processing settings page for all documents except pdf documents, which take longer to identify and OCR.

Correct Answer: B

QUESTION 2

A new business regulation states that a Case Team must preserve Legal Hold Notices within the Symantec Clearwell eDiscovery Platform 7.x after it has been used in litigation. Which function should be used to meet the business regulation?

- A. Edit
- B. Hold
- C. Archive
- D. Export

Correct Answer: C

QUESTION 3

A new data source has been added to the Symantec Clearwell eDiscovery Platform 7.x and has completed pre-processing without exceptions. No additional data has been added to the source since the completion of pre-processing. The Case Team needs all data in the source indexed for the case. Which steps are required when processing the data source?

- A. select the source and configure processing options using the property browser
- B. select the source, apply the necessary date range filter, and process with or without discovery
- C. select the source and configure the processing filters at the source level
- D. select the source and process with or without discovery

Correct Answer: D

QUESTION 4

Case Users report that the search results contain too many items. The system appears to be identifying too many items as similar. For future cases, the Case Admin needs to reduce the number of items that the processing identifies as similar. How should the Case Admin proceed?

- A. check the "Find Similar" box
- B. clear the "Find Similar" box
- C. lower the default document similarity rating
- D. raise the default document similarity rating

Correct Answer: D

QUESTION 5

A Case Reviewer contacted a Case Admin indicating that during the review process the Case Reviewer ran a saved search. Instead of tagging the first item in the search results as Responsive, the Case Reviewer accidentally tagged all 4,000 items discovered in the search. Which steps will undo the bulk tagging?

- A. re-run the saved search > Actions > Tag > Select "No Selection" under the Review tag > Apply to 100% of the Documents > Apply
- B. re-run the saved search > Actions > Tag-Undo > Apply to 100% of the Documents > Apply
- C. re-run the saved search > Actions > Batch > Select "No Selection" under Review > Apply to 100% of the Documents > Apply
- D. re-run the saved search > Actions > Batch > Select UnTag > Apply to 100% of the Documents > Apply

Correct Answer: A
