QUESTION 1

A System Manager needs to generate a report containing information about legal holds, including notice details and custodian statuses on a case. How should the System Manager create the report?

A. in Case Home section in the case > Activity Reports > legal hold report > Go

B. in Case Home section in the case > Case Reports > legal hold report > Go

C. in legal holds section in the case > Action column > Generate Report icon

D. in legal holds section in the case > Generate Report icon

Correct Answer: C

QUESTION 2

A new data source has been added to the Symantec Clearwell eDiscovery Platform 7.x and has completed pre-processing without exceptions. No additional data has been added to the source since the completion of pre-processing. The Case Team needs all data in the source indexed for the case. Which steps are required when processing the data source?

A. select the source and configure processing options using the property browser

B. select the source, apply the necessary date range filter, and process with or without discovery

C. select the source and configure the processing filters at the source level

D. select the source and process with or without discovery

Correct Answer: D

QUESTION 3

A System Manager needs to perform a collection from 200 user mailboxes located on a remote Microsoft Exchange server over a 256K Frame Relay WAN connection. Which approach should the System Manager implement to complete the Collection with minimal impact on day-to-day WAN communication?

A. run Exchange Collection Tasks for the entire source during maintenance hours

B. run Exchange Collection Tasks for the entire source immediately after Symantec Clearwell eDiscovery Platform 7.x is implemented

C. run Exchange Collection Tasks on small groups of mailboxes until completion

D. run Exchange Collection Tasks as a Domain Admin

Correct Answer: C

QUESTION 4

A Case Team needs to determine whether to enable Symantec Clearwell eDiscovery Platform 7.x to extract images from emails and files. Which two considerations should influence the Case Team\\'s decisions? (Select two.)

A. Extracting images can expand the attachment list during review and export.

B. If images extraction is disabled, images are unavailable for viewing.

C. Clearwell gives no indication of whether there are images in a document, so extracting images is an essential step to ensure they will be reviewed.

D. Extracting images is supported for email only.

E. Extracting images enables users to apply OCR to the images, thus generating text and making the images searchable.

Correct Answer: AE

QUESTION 5

A Case Team is using Languages in Advanced Search to identify all documents that (1) contain mostly Spanish language (60 percent or more), and (2) contain some English language. The language predominance threshold for this case was set to 60 percent. How should this search be formulated?

A. Select "Must Contain All of These" for Spanish and "Must Contain At Least One of These" for English.

B. Select "Must Contain All of These" for both Spanish (predominant) and English.

C. Select "Must Contain All of These" for both Spanish and English.

D. Select "Must Contain All of These" for Spanish and English and "Must Not Contain Any of These" for English (predominant).

Correct Answer: B
