QUESTION 1

An administrator changes the Virus and Spyware Protection policy for a specific group that disables Auto-Protect. The administrator assigns the policy and the client systems applies the corresponding policy serial number. Upon visual inspection of a physical client system, the policy serial number is correct. However, Auto-Protect is still enabled on the client system.

Which action should the administrator take to ensure that the desired setting is in place on the client?

A. Restart the client system

B. Run a command on the computer to Update Content

C. Enable the padlock next to the setting in the policy

D. Withdraw the Virus and Spyware Protection policy

Correct Answer: C

QUESTION 2

A company needs to configure an Application and Device Control policy to block read/write access to all USB removable media on its Symantec Endpoint Protection (SEP) systems. Which tool should an administrator use to format the GUID and device IDs as required by SEP?
