### QUESTION 1

A DLP administrator has performed a test deployment of the DLP 15.0 Endpoint agent and now wants to uninstall the agent. However, the administrator no longer remembers the uninstall password. What should the administrator do to work around the password problem?

- A. Apply a new global agent uninstall password in the Enforce management console.
- B. Manually delete all the Endpoint agent files from the test computer and install a new agent package.
- C. Replace the PGP sdk.dll file on the agent's assigned Endpoint server with a copy from a different Endpoint server
- D. Use the UninstallPwdGenerator to create an UninstallPasswordKey.

Correct Answer: D

---

### QUESTION 2

A DLP administrator is checking the System Overview in the Enforce management console, and all of the detection servers are showing as "unknown". The Vontu services are up and running on the detection servers. Thousands of .IDC files are building up in the Incidents directory on the detection servers. There is good network connectivity between the detection servers and the Enforce server when testing with the telnet command.

How should the administrator bring the detection servers to a running state in the Enforce management console?

- A. Restart the Vontu Update Service on the Enforce server
- B. Ensure the Vontu Monitor Controller service is running in the Enforce server
- C. Delete all of the .BAD files in the Incidents folder on the Enforce server
- D. Restart the Vontu Monitor Service on all the affected detection servers

Correct Answer: B

---

### QUESTION 3

Which service encrypts the message when using a Modify SMTP Message response rule?

- A. Network Monitor server
- B. SMTP Prevent
- C. Enforce server
- D. Encryption Gateway

Correct Answer: D
