---

### QUESTION 2

In which two (2) locations should an administrator install the Symantec Installation Manager to facilitate the installation of IT Management Suite 8.1 on the target Notification Server? (Choose two.)

- A. On the server that is to be the Notification Server to create an offline installation if this Notification Server has no internet access
- B. On another server to remotely install it on the target Notification Server
- C. On the server that is to be the Notification Server
- D. It should be installed on a desktop class system to remotely install it on the target Notification Server
- E. On another computer to create an offline installation package if the Notification Server has no internet access

Correct Answer: CE

---

### QUESTION 3

Which object can an administrator add to an organizational group?

- A. User
- B. Report
- C. Policy
- D. Data class

Correct Answer: A

Organization is added as a member of the Organization Management role group. This account can then add other members to the role group as needed.
