QUESTION 1

An administrator notices a large amount of task traffic within the environment. The administrator decides to implement secondary site servers to alleviate task traffic congestion. There are three sites that each have 5,000 managed computers. The administrator has two servers and three old desktops each running Windows Server 2012 to use as site servers.

What should the administrator do to accommodate the different hardware types?

- A. Configure sites and subnets to instruct the managed computers to leverage a specific Task Server
- B. Set the desktop site servers as unconstrained while leaving the server-based site servers as constrained
- C. Create a task settings policy to limit the number of clients the desktop site servers can accommodate
- D. Set the server-based site servers as unconstrained, while leaving the desktop site servers as constrained

Correct Answer: A

QUESTION 2

Which action will create a new Software Update policy?

- A. Right-click an existing software update policy and select "Clone"
- B. Right-click a folder, select "Import" and then select a previously exported software update policy
- C. Right-click a bulletin in the Patch Remediation Center and select "Distribute Packages"
- D. Right-click a folder containing software update policies and select "New", and then select "Software Update Policy"

Correct Answer: A
