QUESTION 1

Which website should an administrator browse to when solving Package Service Installation issues to check that the endpoint can resolve to the server?

- A. <https://SiteServer/Altiris/PackageShare>
- B. <https://SiteServer/Symantec/PSS>
- C. <https://SiteServer/Symantec/PackageShare>
- D. <https://SiteServer/Altiris/PS>

Correct Answer: A

QUESTION 2

Which action will create a new Software Update policy?

- A. Right-click an existing software update policy and select "Clone"
- B. Right-click a folder, select "Import" and then select a previously exported software update policy
- C. Right-click a bulletin in the Patch Remediation Center and select "Distribute Packages"
- D. Right-click a folder containing software update policies and select "New", and then select "Software Update Policy"

Correct Answer: A

QUESTION 3

An administrator is in the process of defining roles within the Symantec Management Console. The administrator adds a user to a Security Role. The user can see the list of reports but cannot execute them.

What must the administrator do in order for the user to be able to execute the reports?

- A. Configure SQL database privileges for the role.
- B. Configure Notification Server permissions for the role.
- C. Configure SQL database permissions for the role.
- D. Configure Notification Server privileges for the role.

Correct Answer: C

Reference: <https://docs.microsoft.com/en-us/sql/relational-databases/security/authentication-access/database-level-roles?view=sql-server-2017>

QUESTION 4

Which component of the Symantec Management Platform attempts to choose a new communication path when the default communication method with the Notification Server is unavailable?

- A. Site Server
- B. Notification Server
- C. Internet Gateway
- D. Symantec Management Agent

Correct Answer: B

Notification Server automatically updates the default communication profile of the old server with the FQDN of the new server. After this change, the communication profile of the old server will remain available, but all references to it are switched to the communication profile of the new server.

QUESTION 5

What tool, installed by default on the notification server, displays a runtime view of the errors, warning, information and trace messages that occur real time?

- A. Altiris Perfmon
- B. Altiris Profiler
- C. Altiris Event Viewer
- D. Altiris Log Viewer

Correct Answer: D
