QUESTION 3

An administrator notices a large amount of task traffic within the environment. The administrator decides to implement secondary site servers to alleviate task traffic congestion. There are three sites that each have 5,000 managed computers. The administrator has two servers and three old desktops each running Windows Server 2012 to use as site servers.

What should the administrator do to accommodate the different hardware types?

- A. Configure sites and subnets to instruct the managed computers to leverage a specific Task Server
- B. Set the desktop site servers as unconstrained while leaving the server-based site servers as constrained
- C. Create a task settings policy to limit the number of clients the desktop site servers can accommodate
- D. Set the server-based site servers as unconstrained, while leaving the desktop site servers as constrained

Correct Answer: A

QUESTION 4

A large organization wants to stagger the installation of software updates with computers in different organizational groups by installing the updates on different days.

How can an administrator accomplish this without continually creating separate software update policies that target the different organizational groups?

- A. Configure Site Management settings so that each organizational group downloads the software update installation files from a different package server
- B. Create clones of the Default Software Update Plug-in Policy and modify the target in each policy
- C. Configure an automation policy that periodically disables the Software Update Plug-in by organizational group
- D. Create clones of the Windows Patch Remediation Settings and modify the target in each policy

Correct Answer: A

QUESTION 5

An administrator is tasked with tracking the IT department's vehicles. The department currently has 8 vehicles and is expected to add 4 additional vehicles during the next year.

Which steps must the administrator take to track the vehicles?

- A. Create a vehicle resource type, create vehicle-related data classes, add the data classes to the resource type, create a resource association from the vehicle resource type to Departments.
- B. Create the vehicle-related data classes, create a vehicle resource type within the IT Department's departmental organizational structure, set the vehicle default values, define the vehicle data constraints.
- C. Create a vehicle resource type, set the vehicle default values, create a resource association from the vehicle resource type to departments, define vehicle data constraints.
- D. Create the vehicle-related data classes, create a vehicle resource type within the IT Department's departmental organizational structure, define the vehicle data constraints.

Correct Answer: A
