QUESTION 1

Which DLP Agent task is unique to the Symantec Management Platform and is unavailable through the Enforce console?

- A. Change Endpoint server
- B. Restart agent
- C. Pull agent logs
- D. Toggle print screen

Correct Answer: D

QUESTION 2

Ten test agents are being deployed that use an uninstall password required to uninstall the DLP Agent. The agents deploy and install correctly. Upon testing to remove the Agent, the uninstall password fails to work. The deployment team used `\\Symantec\` for the `UninstallPasswordKey`.

Why does the uninstall fail when using the same password?

- A. uninstall passwords are restricted from containing the word `\\Symantec\`
- B. the `UninstallPwdKeyGenerator` must be used to create an `UninstallPasswordKey`
- C. the `PGPsd.dll` file was missing when the key was created
- D. the uninstall agent password needs to match the uninstall password key

Correct Answer: B

QUESTION 3

A compliance officer needs to understand how the company is complying with its data security policies over time. Which report should the compliance officer generate to obtain the compliance information?

- A. Policy Trend report, summarized by policy, then quarter
- B. Policy Trend report, summarized by policy, then severity
- C. Policy report, filtered on quarter, and summarized by policy
- D. Policy report, filtered on date, and summarized by policy

Correct Answer: A

QUESTION 4

After you install Veritas Enterprise Administrator to manage Storage Foundation 5.0, you attempt to start the Veritas Enterprise Administrator, but are prompted with an error "Veritas VM Storage Administrator Server Terminated. Stopping Veritas VM Storage Administrator Server ### Terminated."

How do you solve this problem?

- A. Enable the VMSA auto-start mode and restart.
- B. Restart Veritas Enterprise Administrator.
- C. Restart the Volume Manager Storage administrator (VMSA) Server.
- D. Disable the VMSA auto-start mode and restart.

Correct Answer: D

QUESTION 5

You are administering the Storage Foundation 5.0 environment in your organization. There is one particular file system that continually shows a high level of fragmentation.

What should you do to prevent fragmentation?

- A. Use the df command regularly to monitor free space.
- B. Schedule regular defragmentation runs using the cron command.
- C. Set the initial_extent_size tunable VxFS I/O parameter.
- D. Allocate the space available in the file system that best fits the data.

Correct Answer: B
