QUESTION 1

Company X wants to use Cascade for monitoring the performance of their SQL application to all remote sites before considering purchasing any WAN optimization technology. They would like to add a Cascade Sensor to their network, and therefore they must:

- A. Enable SPAN or mirror port on a switch in their datacenter, which has visibility of the SQL traffic in question.
- B. Enable a SPAN or mirror port all remote sites where users of the SQL application sit.
- C. Enable NetFlow on at least all WAN routers that carry the SQL traffic.
- D. Configure the SQL servers to send their SNMP traps to the Cascade Profiler.
- E. Configure the SQL servers to send their SNMP traps to the Cascade Gateway.

Correct Answer: A

QUESTION 2

How does Cascade acquire the Interface Name (ifname) and interface speed (ifspeed) for interfaces reporting to Cascade?

- A. SNMP polling from the Gateway
- B. SNMP polling from the Profiler
- C. SYSLOG
- D. All of the above
- E. None of the above

Correct Answer: A

QUESTION 3

Cascade provides a means for contacting other network devices for additional information about a host or user of interest. Right-clicking a host name, IP address, MAC address or port number and choosing _____ from the shortcut menu sends a query to the other network device.

- A. View Packets
- B. Error Report
- C. Restart Service
- D. View Switch Port
- E. External Link

Correct Answer: E

QUESTION 4

You can analyze data on Cascade Pilot received from live interfaces iF. (Select 2)

- A. Cascade Pilot is started with administrator privileges.
- B. Cascade Shark is configured to show capture ports.
- C. You apply a View to the interface and create a Watch on Web traffic.
- D. You have privileges to do so in your user profile.

Correct Answer: AD

QUESTION 5

How is the Cascade Pilot license activated?

- A. The license key is entered during installation. The license is activated either through an Internet connection or by phone.
- B. The license key is entered during installation. The license must be activated through an Internet connection.
- C. The license key is entered during installation. There is no activation but Cascade Pilot will detect if the license is already in use on the network.
- D. There is no license key activation. The software image is shipped with the license key installed.

Correct Answer: A
