QUESTION 1

One advantage of using a trace clip for analysis within Cascade Pilot instead of its parent capture job trace is:

- A. The trace clip is likely smaller in size, so views load faster.
- B. The trace clip is moved to the local system, so views load faster.
- C. The trace clip has a base set of views pre-applied, so analysis is faster.
- D. The trace clip is guaranteed to have trend/index data, so views load faster.

Correct Answer: A

QUESTION 2
