QUESTION 1

In vRealize Automation Cloud Assembly, what can administrators use Onboarding Plans to do?

A. View a list of virtual machines that have not yet been data-collected from a public cloud account.

B. Identify virtual machines that have been data-collected from a configured cloud account but are not yet managed by vRealize Automation.

C. Identify virtual machines that were deployed using vRealize Automation.

D. Find the best blueprint to match to discovered virtual machines.

Correct Answer: B

Reference: https://docs.vmware.com/en/vRealize-Automation/8.0/Using-and-Managing-Cloud-Assembly/ GUID-B8037EFB-27A9-4351-A528-E3FFFB5DD586.html#:~:text=Use%20an%20onboarding%20plan% 20to,create%20one%20or% 20many%20deployments

QUESTION 2

An administrator is building a blueprint to allow users to select a cloud type.

The cloud type options are:

Amazon Web Services vSphere

Where will the administrator configure capability tags so that the proper compute is selected at the time of deployment?

A. Projects

B. Cloud Accounts

C. Cloud Zones

D. Network Profile

Correct Answer: C

Reference: https://docs.vmware.com/en/vRealize-Automation/8.1/Using-and-Managing-Cloud-Assembly/ GUID-8E630DEA-4732-45FC-9655-6933D55818C1.html

QUESTION 3

An administrator is trying to create a new set of image mappings that will map to vSphere templates within a new vCenter Server cloud account. When the administrator tries to select the Windows Server 2016 image, nothing appears on the list. The administrator has confirmed that the vSphere template exists in the correct location within vCenter Server.

Which action should the administrator take to be able to create the new image mapping?

A. Make sure the correct NSX endpoint is selected for the vCenter Server cloud account.

B. Validate the vCenter Server cloud account credentials.

C. Add a new capability tag to the vCenter Server cloud account.

D. Check to make sure image synchronization is successful for the vCenter Server cloud account.

Correct Answer: C

QUESTION 4

Which two actions can be performed against a Cloud Assembly machine-based deployment? (Choose two.)

A. Change lease for the deployment.

B. Resize the deployment.

C. Run machine-level actions including adding USB controller.

D. Change machine IP address assignment to DHCP.

E. Power off the deployment.

Correct Answer: AE

---

QUESTION 5

An administrator is tasked with creating cloud zones for an existing Amazon Web Services (AWS) cloud account.

Which type of compute resource can be added to the cloud zone?

A. Cluster

B. Elastic Cloud Compute (EC2) Instances

C. Availability Zones

D. Virtual Private Cloud (VPC)

Correct Answer: A
