### QUESTION 1

What is the function of Action-Based Extensibility (ABX)? (Choose the best answer.)

- A. It provides the capability to migrate content between instances of vRealize Automation.
- B. It provides efficient capacity and cost management for managed virtual machines.
- C. It provides intelligent remediation and integrated compliance for security patches.
- D. It provides a way to execute stateless function, which contain reusable parameterized actions.

Correct Answer: D

---

### QUESTION 2

An administrator is trying to synchronize a new cloud template into the App-Dev project. The administrator copies the cloud template code directly from Cloud Assembly into a text file and uploads it into the Github repository so that it can be synchronized to the App-Dev project.

When the administrator clicks 'Synch Repos', a new cloud template does not appear.

Which step must the administrator take to allow it to synchronize from the Github repository?

- A. Add the name and version to the cloud template YAML code.
- B. Clone the cloud template
- C. Release the cloud template
- D. Upload the cloud template

Correct Answer: A
