QUESTION 1

A Horizon administrator does not see the health status for the Unified Access Gateways (UAG) they configured in the Horizon Console. What two options could be causing the issue? (Choose two.)

- A. The firewall hasn't been configured properly to allow traffic on port 443.
- B. The pod needs to be added to the Cloud Pod Federation.
- C. The Connection Server needs to be rebooted.
- D. Another license is needed for UAG health overview.
- E. The name entered in the Horizon console doesn't match up with the system name in UAG.

Correct Answer: AE

QUESTION 2

An administrator is leveraging PCoIP protocol in their Horizon environment and wants to distribute clients to end users that have the smallest footprint possible with no local operating system. Which client type satisfies these requirements?

- A. Teradici based zero clients
- B. Windows embedded thin client
- C. MacOS Client
- D. Android based thin client

Correct Answer: A

QUESTION 3

An administrator is tasked with allowing managers to request desktops and changes to desktops for their employees. What VMware solution can be used to meet this requirement?

- A. vRealize Operations
- B. Horizon Automated Pools
- C. vRealize Automation
- D. Horizon Help Desk

Correct Answer: C

<https://docs.vmware.com/en/VMware-Horizon-7/7.13/using-vro-plugin-for-horizon/GUID-60AE2989-8D25-4C43-BB7C-64F370C25D0E.html> For an end-user enablement, vRealize Orchestrator

Plug-in for Horizon integrates with vRealize Automation to provide self-service access to applications and desktops. The plug-in workflows can be integrated with the request and approval processes that are built into the vRealize Automation service catalog, allowing end users to refresh their own desktops. End users can make requests that follow a standardized and auditable process that can result in immediate action, or they can direct their requests for administrative approval. For desktop environments where virtual machines must support rapid change and reuse, end users can provision desktops for themselves and de-provision, or recycle, the desktops to reduce waste of resources and capacity.

QUESTION 4

What is the benefit of using the Browse local Profile feature in the Dynamic Environment Manager to adjust the Import/Export configuration for an application DirectFlex?

- A. The Import/Export Config can be deleted from a user profile.
- B. The Microsoft Windows users profile configuration can be changed.
- C. It allows backup of the user profile.
- D. The registry or filesystem paths do not have to be typed in the editor.

Correct Answer: D

QUESTION 5

An end-user is experiencing a black screen when connecting to their virtual desktop. After a few seconds, the connection closes. Which could be the cause of the issue? (Choose three.)

- A. The Client machine video memory is too high.
- B. There is a vRAM shortage on the Horizon virtual machine.
- C. The Horizon Virtual Machine video memory is too high.
- D. There is an incorrect firewall configuration.
- E. The incorrect video driver version is installed on the Horizon virtual machine.

Correct Answer: BDE
