QUESTION 1

An administrator needs to monitor Connection Server health by using a http request. Which command is the correct command to use?

A. GET https://:22443/favicon.ico

B. GET https://:9443/favicon.ico

C. GET https://:443/favicon.ico

D. GET https://:4172/favicon.ico

Correct Answer: C

QUESTION 2

An administrator sees a lot of instant-clone template VM\\'s that are not in use anymore in vCenter. What tool needs to be used to clean up old templates?

A. iccleanup.cmd

B. icunprotect.cmd

C. vdmadmin.exe

D. icmaint.cmd

Correct Answer: A

On the Connection Server are three utilities that you can use for the maintenance of instant-clone VMs in vCenter Server and the clusters that the VMs are in. The utilities are IcMaint.cmd, IcUnprotect.cmd, and IcCleanup.cmd and are located in C:\Program Files\VMware\VMware View\Server\tools\bin.

QUESTION 3

DRAG DROP

An administrator is tasked with reinstalling a Connection Server replica that has failed to boot.

Drag and drop the procedural steps on the left into the correct order on the right to add the replica back to the Horizon pod with the same name.

Select and Place:

Procedural Step	Correct Sequence
Remove replica server from the pod using vdmadmin	Step 1
Power Off the failed replica server	Step 2
Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod	Step 3

Correct Answer:

Procedural Step	Correct Sequence	
	Step 1	Power Off the failed replica server
	Step 2	Remove replica server from the pod using vdmadmin
	Step 3	Deploy the new VM with the same name and install the Connection Server replica, pointing to one of the working connection servers in the pod

QUESTION 4

Refer to the exhibit.

An administrator configures a CA certificate for the Connection Server. However, they are still encountering certificate warnings when trying to connect to the Connection Server. The exhibit displays the properties of the CA-Signed certificate. Referring to the exhibit and using the alpha-character indicator, which image shows the root cause of the issue?

A. D

B. C

C. A

D. B

Correct Answer: D

Assign the friendly name "vdm" to only one certificate on each VMware Horizon server host.

QUESTION 5

A company that is currently using VMware Horizon with instant-clones is researching the possibility of using VMware Horizon Cloud on Azure. What deployment option is available for Horizon on Azure?

A. Horizon Cloud on Azure with instant-clones

B. Horizon Cloud on Azure with full-clones

C. Horizon Cloud on Azure with Azure clones

D. Horizon Cloud on Azure with WVD

Correct Answer: B

There is no such thing as instant clones in Azure. All clones are full clones. The speed with which clones are created depends on the type of disk you select.
