QUESTION 1

An administrator is running a View Infrastructure with Linked Clones running on ESXi 5.x. Users should not be able to eject devices such as CD-ROMs from the virtual desktops.

What should the administrator do on the vSphere Client to prevent users from ejecting devices?

A. Right click on the parent image, and then in Edit Settings-->Options, disable Hot Add.

B. Modify the parent image .vmx file, and set devices.hotplug to False.

C. Modify the parent image .nvram file, and set devices.hotplug to False.

D. Right click on the parent image and then in Edit Settings-->Hardware, disable Hot Plug.

Correct Answer: B

QUESTION 2

A View environment includes a View Connection Server and View Security Server.

The View Connection Server has the following configuration:

DNS Name: view.company.com

IP Address: 192.168.1.1

The View Security Server has the following configuration:

DNS Name: security.company.com

IP Address: 10.10.10.1

An administrator needs to set up View to allow external access for users via PCoIP. Which option represents the format in which information must be entered into the PCoIP External URL field in View Administrator?

A. https://security.company.com:443

B. https://10.10.10.1:4172

C. 10.10.10.1:4172

D. security.company.com:4172

Correct Answer: C

QUESTION 3

Which virtual disk type should an administrator use to reclaim unused space in a Linked Clone?

A. Thin Provisioned Disk

B. SE Sparse Disk

C. Monolithic Sparse Disk

D. Flat Disk

Correct Answer: B

QUESTION 4

An organization has deployed a View environment. Users need to connect USB devices to their View

sessions.

All client endpoints are Windows 7 thin clients.

A firewall is in place through which all network traffic flows. All Windows patches are up to date on guest

virtual machines and endpoints.

Users report that USB devices are not connecting to the View sessions when they are plugged in to the thin

clients.

What are two reasons that could cause this behavior? (Choose two.)

A. TCP port 9427 is closed on the firewall.

B. TCP port 32111 is closed on the firewall.

C. Windows Mobile Device Center is preventing USB redirection.

D. USB redirection drivers on the guest virtual machine are missing or disabled.

Correct Answer: BD

QUESTION 5

A Cloud Pod Architecture environment has datacenters in New York and Los Angeles. Users have a Global Home Site configured for the datacenter geographically closest to their home office. When users travel, they connect to the VPN for the datacenter closest to their current geographic location.

When users log into Horizon to access their desktops, which statement is correct regarding the desktop they will connect to?

A. Users will always be connected to a desktop in their Global Home Site. If no desktops are available in that site, users will receive a message stating no desktop resources are available.

B. Users will be connected to an entitled desktop in the site for the VPN they selected, if one is available.

C. Users will be connected to a desktop in the site configured for the security group of which they are a member. If no desktops are available in that site, one will be provided from their Global Home Site.

D. Users will be connected to a desktop in their Global Home Site. If none are available, users will be connected to a desktop in the other site.

Correct Answer: D
